

Bionic Giant is seeking a lead developer for a wide variety of projects as part of our special ops team in the Minneapolis/St. Paul office. Bring your skills and passion, and together we will mutually reach new heights. Candidates must be local.

About You

You have crazy coding skills, and you're not afraid to use them. Your teammates can count on you to follow a project through and continually inspire them to a higher state of performance. You know how to problem solve and deliver the best to the client. You love a challenge, have great attention to detail, and excel in time management.

About Us

Bionic Giant is a creative agency headquartered in Minneapolis, with a satellite office in Denver. We work for a variety of brands in various industries, providing digital solutions such as branding/design, strategy, websites, video, and mobile apps. Great work happens through great people. Our devotion to our clients is matched only by our loyalty to one another. We believe in bold generosity and courageous humility from the first draft to the final handoff. We work hard and play hard. We challenge each other, and have fun doing it.

Technical Requirements

- Very strong proficiency with JavaScript, HTML, CSS, and PHP
- Experience with custom JavaScript solutions in jQuery, Vue.js or React
- Proficiency developing custom WordPress themes and plugins
- Experience with Git source control
- Experience developing for multiple browsers, devices, and screen sizes
- Strong understanding of responsive web design
- Ability to translate a Photoshop or Sketch design into a working website
- Ability to diagnosis cross platform issues and solve them in creative ways
- Translate UX/UI designs to actual code, test the code, and deploy the code
- Contribute ideas for website improvements and solutions to technology challenges
- Passion for continued learning, staying abreast of new technology and techniques
- Deliver clean code, maintaining design, user experience, and brand requirements throughout the development process

Technical “Nice-to-Haves”

- Experience using Laravel PHP Framework
- Experience with Google Analytics/SEO
- Knowledge of AWS
- Knowledge of HubSpot
